## Skills

### Frameworks

React.js, Vue.js, Node.js, Tailwind CSS, Bootstrap, Restify, jQuery

### Languages

Javascript (ES6), HTML5, CSS3, SASS

### Other

Git, Postman, APIs, NPM, Firebase, MailChimp, Heroku, Web APIs

## Professional Experience

### Business Applications Developer

September 2020 – Present

*A2Z Cloud*

- Participated in both daily **scrum** meetings and **client** meetings.
- Configured Zoho Applications to meet **client requirements**.
- Developed integrations using **3rd party APIs (REST)** into the Zoho Product Suite.
- Coded using a domain-specific language & **Javascript** to build optimal solutions.
- Developed innovative dashboards & pages in **React.js** & **Vue.js** and **SDKs** for **internal use**.
- Monitored & **resolved issues** that were sent to the company support portal.
- **Provided consultation** to clients about their systems, requirements and transition into another system.

### Junior Software Developer

January 2020 – April 2020

*\_nology*

- Developed Web Applications from scratch to a high standard using **React.js**
- Worked on **clients' projects** while ensuring excellent adherence to timeframes and expectations.
- Participated in **pair programming**; worked collaboratively and professionally with co-workers.
- Learned and implemented new content and tools, found solutions and **contributed** to the work process.

## Personal Projects

### Undisclosed Company - Portfolio

August 2020 – August 2020

*Wordpress, HTML5, CSS3, Bootstrap, JQuery*

- Designed and built a business website using **WordPress** for a home improvement retailing company.
- Created mock-ups using **Adobe XD** for prototyping as a visual aid for the Client.

### TI Accounting - Portfolio

May 2020 – August 2020

*React.js, EmailJS, SASS, NodeJS, Restify, MailChimp, Heroku*

- Developed a portfolio website for an Accounting business using **React.js**, hosted on **Heroku**.
- Integrated **MailChimp** with **Node.js** and **Restify** to send out campaigns email to subscribed visitors.
- Architected a workflow using **EmailJS** where the Owner receives an email notification when visitors post messages through the "Contact Me" page.

### Morse Code Translator

April 2020 – April 2020

*HTML5, CSS3, Javascript, Web API, Firebase*

- Developed a translator that can listen to your sentence in words and translate it into morse code, vice versa.
- Used **SpeechRecognition Web API** to capture audio to be translated, either as words or morse code.
- Preprocessed the text using **Regex** to filter and validate the text before translation.
- Allowed the output to be played back as audio using **SpeechSynthesis Web API**.

## Education

### *\_nology*

2020 – 2020

Software Development Bootcamp

### Wiltshire College

2019 – 2019

Functional Skills Level 2 English
